

THE UNIVERSITY OF ARIZONA

NORTON SCHOOL OF HUMAN ECOLOGY

Frances McClelland
Institute for Children,
Youth & Families

We are pleased to share our new updates from FMI! We will be launching our new website with streamlined navigation tools to you all very soon. As well as a new look to our newsletters and communications. Stay tuned to learn more about our work and to access resources for researchers and community members in the redesigned site.

We recently hosted two Turbeville talks. On January 26th Dr. Em Matsuno from Arizona State University joined us virtually to discuss their research on the development and implementation of a virtual support program for parents of transgender and gender-expansive youth. On February 16th Dr. Maurice Magaña from Mexican American Studies at UArizona shared his work on grassroots archives created by artists and activists from diasporic, racialized communities in the US and Mexico. If you missed either of these informative talks, you can watch them now on our [YouTube channel](#). We also partnered to host a successful film screening on campus. See below for details.

Looking ahead to the coming weeks, we will host a data blitz for HDFS graduate students and faculty to share their areas of research, the next installment of the Turbeville speaker series, and two methods workshops

facilitated by the Community Research Evaluation and Development (CRED) Team.

This is Black History Month, an important time to recognize the history and ongoing oppression and resilience of Black communities in the United States. We want to share a recently released two-volume report by Child Trends, [**A 100-year Review of Research on Black Families**](#). This report points to critical areas where researchers can move forward in partnership with Black communities to develop research aimed at increasing equity for Black children and families.

At FMI, we are committed throughout the year to collaborating to use the power of research to achieve social justice so that children, youth and families from marginalized backgrounds have opportunities to thrive.

Co-Sponsored Events

>>> On February 15th, FMI cosponsored with the Children's Advocacy Center of Southern Arizona a screening of the film *Resilience*. This powerful film describes the impact of stress and exposure to Adverse Childhood Experiences (ACEs) on children and families and highlights community-based efforts to reduce ACEs to promote resilience. More than 100 people, including students and community members, attended this on-campus event. After watching the film, participants brainstormed actions they can take to reduce ACEs in their communities.<<<

2023 Annual Report!

We are pleased to share that we recently released our newest Family Link to describe our accomplishments in 2023. In this annual report, we highlight our activities like the Frances McClelland Vision Awards, HDFS Graduate Student Awards, and much more!
